MEADE WILLIS

XRP EDI: ELECTRONIC DATA INTERCHANGE

WWW.MEADEWILLIS.COM

Meade Willis XRP EDI cloud-based solution allows companies to virtually exchange documents with trading partners anywhere in the world. The solution supports all EDI versions, including: X12, EDIFACT, and many others.

BENEFITS

Cost savings:

> Expenses associated with paper, printing, storage, filling and postage can be eliminated or reduced up to 40%.

> Errors due to illegible faxes, lost orders or incorrectly taken phone orders are mostly eliminated, saving valuable time handling data disputes.

Speed and Accuracy:

> Speed up business cycles by up to 60%. Exchange transactions in seconds instead of longer manual processing and delivering time.

> Improves information quality, delivering up to 30 to 40% reduction in transactions with errors.

Increase business efficiency:

> Automating processes ensures that business-critical data is available on time and can be monitored and tracked in every step of the workflow.

> Streamline your ability to enter new markets: the solution provides a common business language that facilitates business partner onboarding anywhere in the world.

KEY FEATURES

> Web form data entry templates
> Rules Validation
> Human readable views
> Auto-population of values to reduce human error
