MEADE WILLIS

XRP WAREHOUSE MANAGEMENT SYSTEM

WWW.MEADEWILLIS.COM

MW's XRP WMS enables organizations to manage & optimize all inventory processes & warehousing activities. The system allows management of orders, receiving, stocking & replenishment, enabling the set up of inventory rules and automatic notifications. WMS is designed to accommodate small/mid/large enterprise requirements.

BENEFITS

XRP WMS can operate independently as a stand-alone system or can be fully integrated with both internal and external systems. Some other benefits are:

- ✓ Refined demand planning
- ✓ Increased visibility, transparency, & traceability
- ✓ Elimination of manual entry errors
- ✓ Maximized labor productivity
- ✓ Reduced maintenance and support costs
- ✓ Fully customizable system
- ✓ Minimal deployment footprint
