

WORKFLOW APPS & PORTALS

WWW.MEADEWILLIS.COM

Meade Willis' Workflow Apps and Portals allow users to operate more efficiently and enforce manual business processes through automated solutions. These solutions provide users with easy access to the right information at the right time - informing, organizing, and connecting suppliers, customers and partners through a stable, secure, and cloud-based platform.

All 'on demand' Workflow Apps and Portals can operate as stand alone solutions or can be fully integrated with all XRP Suite modules and client's existing systems. The solutions integrate web portals with handheld barcode scanners or mobile computing platforms, providing automated solutions for inventory control, authorization workflows, process management, among other functionalities.
