PURCHASE ORDER MANAGEMENT

WWW.MEADEWILLIS.COM

Meade Willis' Purchase Order Management is a cloud-based application that provides real time control and processing of sales and purchase transactions. The solution replaces error prone spreadsheets, repetitive phone calls and countless emails with a single, modern interface that enables seamless and real-time communication, PO status tracking, and much more.

Meade Willis' Purchase Order Management system is designed for small, medium and large companies in various industries (automotive, retail, manufacturing, food & beverage, logistics, pharmaceutical, etc.).

KEY FEATURES & BENEFITS:

- Real-time budget control and follow-ups
- Streamlined cash flow (tracking of spend from beginning to end)
- Configuration of Business Rules to create POs according to different parameters
- EDI integrations allow companies to automatically purchase from larger vendors
- Data collection and reporting to help with purchasing decisions
